ROUND MOUNTAIN 500 KV AREA DYNAMIC REACTIVE SUPPORT PROJECT (Fern Road Substation)

Please join us for a **Drive-through Open House.**

Date: June 29, 2021

Time: 5:00 – 8:00 pm

Location: Whitmore Elementary School
30611 Whitmore Road, Whitmore, CA

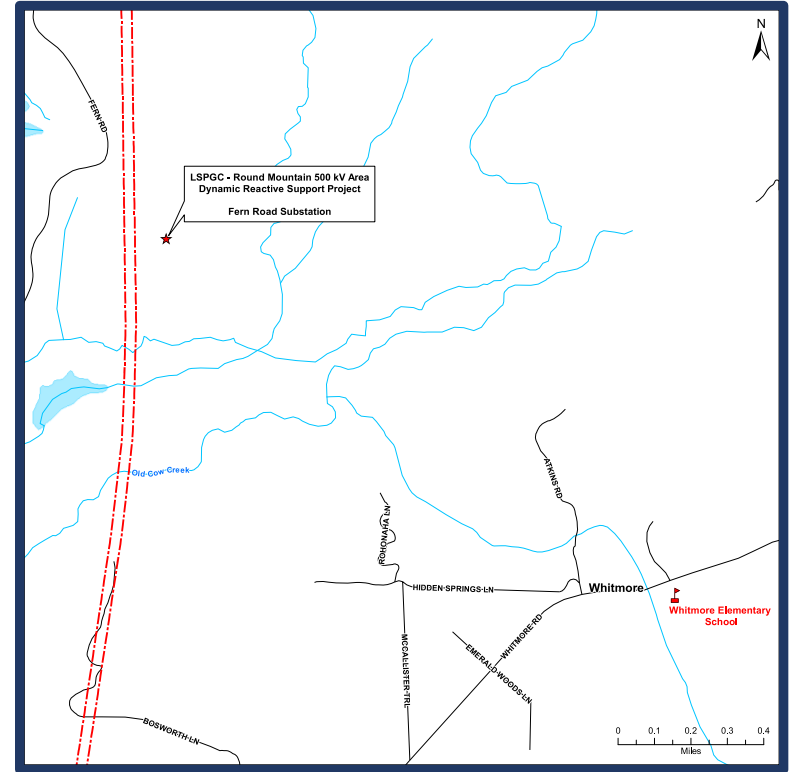

LS Power Grid California, LLC (LSPGC), is proposing to construct and operate a dynamic reactive support facility to include Static Synchronous Compensator (STATCOM) units located within the proposed Fern Road Substation, which will be independently connected (i.e., looped-in) to the PG&E regional electric transmission system. The STATCOM units will support the regional electric transmission system by providing voltage support and grid stability and facilitating reliable operation of the regional extra high voltage transmission system.

Project representatives will be available to talk to individuals while driving through our open house stations. You can come at any time between 5:00 p.m. and 8:00 p.m.

For more information, please visit

www.lspgridcalifornia.com/round-mountain

or call our Project Information Number at **(833) 310-6345.**

PROJECT OVERVIEW

PURPOSE AND NEED

- The Proposed Project was approved by the California Independent System Operator (CAISO) to ensure the reliability of a major portion of the California electric grid.
- Static Synchronous Compensator (STATCOM) units will support the regional electric transmission system by providing voltage support and grid stability at both the Round Mountain and Table Mountain PG&E substations.
- This will facilitate the reliable operation of the regional high voltage transmission system.

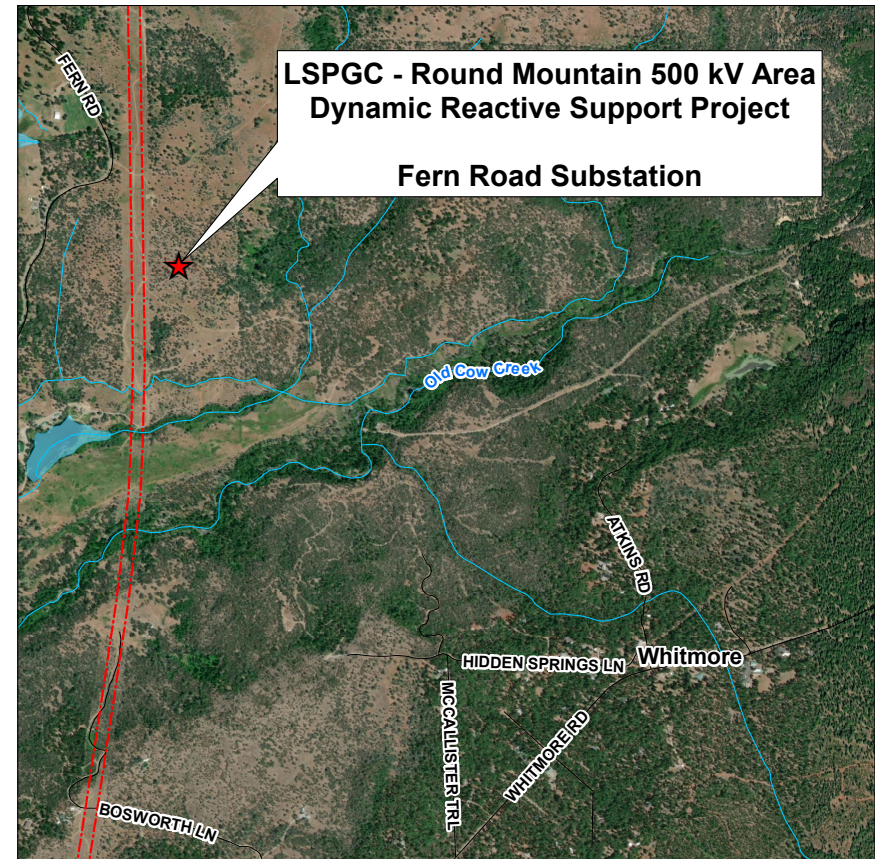

WHO ARE WE?

- Founded in 1990, LS Power is a development, investment and operating company focused on the North American power and energy infrastructure sector.
- LS Power Grid California, LLC (LSPGC) is a wholly owned subsidiary of LS Power established to own and operate transmission projects in California
- Development of over 660 miles of high voltage transmission
- Developed, constructed, managed or acquired more than 45,000 MW of power generation, including utility-scale solar, wind, hydro, natural gas-fired and battery energy storage projects.

PROJECT DESCRIPTION

- The Proposed Project, referred to as the **Fern Road Substation**, includes an approximately +/-529 MVAR (million volt-amperes, reactive) dynamic reactive support facility to include a minimum of two equally sized Static Synchronous Compensator (STATCOM) units.
- The STATCOM units will be located within the proposed Fern Road Substation and will be independently connected (i.e., looped-in) to PG&E regional electric transmission system via the Round Mountain and Table Mountain 500 kV transmission lines that are located adjacent to the Proposed Project site.

TENATIVE CONSTRUCTION SCHEDULE

	Approximate Start Date	Approximate End Date
Site Development (includes access road)	11/2022	02/2023
Below-Grade Construction	02/2023	08/2023
PG&E 500 kV Interconnection	03/2023	10/2023
Above-Grade Construction and Equipment Installation	04/2023	10/2023
System Upgrades	11/2022	09/2023
Commissioning and Testing	09/2023	12/2023

ENVIRONMENTAL AND PERMITTING

ENVIRONMENTAL ANALYSIS

- LSPGC will be submitting a Permit to Construct (PTC) Application and associated Proponents Environmental Assessment (PEA) to the California Public Utilities Commission (CPUC) in the summer of 2021.
- LSPGC held a consultation meeting with the California Department of Fish and Wildlife (CDFW) to discuss potential biological resources on the Proposed Project site and to develop plant and wildlife survey requirements.
- Based on information provided by both the CPUC and CDFW, LSPGC has completed the following technical evaluations as part of the environmental review of the Proposed Project:
 - Cultural Resources Class III Survey
 - Wetland Delineation Assessment
 - Botanical Survey
 - Nesting Bird/ Raptor Survey
 - Phase I Environmental Site Assessment
 - Bumble Bee Survey
- Additional environmental studies are being conducted as part of the PEA.

CALIFORNIA PUBLIC UTILITIES COMMISSION (CPUC) ENVIRONMENTAL PROCESS

1. LS Power will file application with CPUC, including the Proponent's Environmental Assessment (PEA)
2. CPUC PEA completeness determination
3. CPUC environmental review and public meetings
4. CPUC drafts environmental document (EIR or MND)
5. Public comments on draft EIR/MND
6. Final EIR/MND prepared by CPUC
7. CPUC proposed decision
8. Public comments on proposed decision
9. CPUC final decision and final EIR/MND certified

Process per Public Resources Code section 21000 et. seq.,
the California Environmental Quality Act (CEQA) and CEQA Guidelines

Round Mountain 500 kV Area Dynamic Reactive Support Project Open House

Post-Event Summary

**Round Mountain 500 kV Area Dynamic Reactive Support Project
Open House**

Post-Event Summary

Date: June 29, 2021

Time: 5:00 PM – 8:00 PM

Location: Whitmore Elementary School
30611 Whitmore Rd. Whitmore, CA

Open House Stations:

	Station Content
Sign-In Station	<ul style="list-style-type: none">• Sign-in• Project Info Package – fact sheet, comment card• Water and snacks
Station 1: Project Overview	<ul style="list-style-type: none">• Purpose and Need• Who Are We? (LS Power)• Project Description• Project Overview Map
Station 2: Engineering and Construction	<ul style="list-style-type: none">• Conceptual General Arrangement• Rendering Looking Northwest• Tentative Construction Schedule
Station 3: Environmental and Permitting	<ul style="list-style-type: none">• Environmental Analysis• CPUC Environmental Process• Rendering Looking Northeast

Project Team Members Present:

LS Power	Mark Milburn	Dave Wilson		
Heritage	Pat Golden			
KP Environmental	Kenda Pollio	Dustin Joseph	Megan Good	Haley Hein

Public Attendees:

Mary Rickert, Shasta County Supervisor– District 3

Linda Barneby, Whitmore Elementary School staff member

- Took several Project fact sheets and Open House invitations to share with community members

Jerry Eubanks, neighbor located west of Project

Everett McClellan, neighbor located south of Project

Verbal Questions/ Comments from Attendees regarding:

- Noise
- Lighting
- Impacts from traffic and roads
- Wildlife and preserving habitat
- Wildfire risk

Comment Forms:

Comment forms were provided to each attendee, but none were returned in-person. However, since the comment cards were designed as mailers, we may still receive these back via mail in the future.
