July 22, 2009

Dear Sir,

I know you have worked very hard on this project but I want you to know I am very much opposed to Rt. 2 because:

1. I live on the Route 2. Rout 3 is the best route because:
2. It uses more of the existing right-of-way.
3. The route's primary negative, the Stone Corral Ecological Preserve, can easily be circumvented by moving the line just a little.
4. There is less damage to intensive agriculture.
5. Routes 1, 2 and 6 have more negative environmental impacts to agriculture, communities and people.

Thank you for your consideration.

Barbara Hinley
