Comment Letter I64

Re: Cross Valley Loop in Tulare County, California
 for Transmission of Power.

I am writing to ask you to consider using
 Route 3, instead of using the proposed Line 2
 through Elderwood.

I am a second-generation owner of citrus and
 cattle property which lies quite near the proposed
 Line 2. Our family has owned this property since
 1914, and I have children and grandchildren who
 live near Elderwood is a very attractive area
 with productive farm land and scenic beauty.
 Many people have chosen to live here.

The Power Line on Route 2 will destroy many
 acres of good producing agricultural crops and
 create a very unattractive slash right through
 Elderwood. Owners have invested a lot of
 money to develop this land and many
 valuable acres will be permanently lost.

Alternate Route 3 is available which
 seems to be the more logical Route to
 use. Instead of either Routes 1 or 2,
 Route 3 would be far less destructive to
 developed property and not destroy the
 natural attractiveness of the settled
 area.

Thank you for your consideration of
 this matter.

Sincerely,
 Lenora M. Graves,
 Very concerned citizen.
