

## PUBLIC UTILITIES COMMISSION

505 VAN NESS AVENUE  
SAN FRANCISCO, CA 94102-3298

February 4, 2025

Mr. David Balandran  
Regulatory Affairs – Infrastructure Programs & Projects  
Southern California Edison  
8631 Rush St.  
Rosemead, CA 91770

**Subject: Southern California Edison's Control-Silver Peak Project (A.21-08-009) – Data Request No. 3**

Dear Mr. Balandran:

Please see below Data Request No. 3 for the Control-Silver Peak Project. This request pertains to an alternative route for the subtransmission line, as shown in the attached figure. Please reach out to our team for any questions regarding this request.

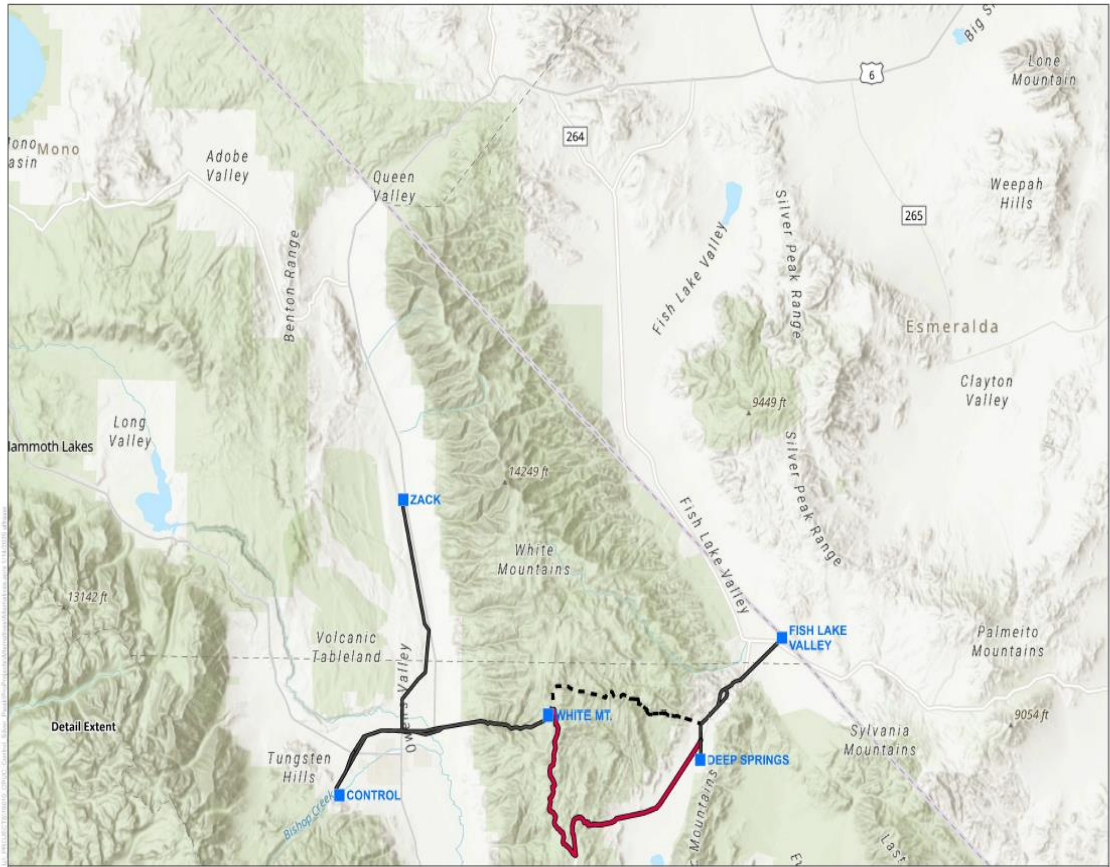

1. Please provide any comments regarding feasibility, ability to meet most project objectives, and other potential constraints for the route depicted on the figure (attached). As shown, the route would generally follow White Mountain Road and then Highway 168 before reconnecting with the existing subtransmission line toward the Fish Lake Valley Metering Station.

The CPUC requests that a response to this data request be provided within two weeks.

Regards,

A handwritten signature in cursive script that reads "Eric Chiang".

Eric Chiang
