Gentlemen:

DRAFT EIR FOR THE ESTRELLA SUBSTATION AND THE PASO AREA
REINFORCEMENT PROJECT (A. 71. 01 0230) DRAFT EIR.

I am concerned about the proposed routing of the 70kV Transmission line. That route would run north along Golden Hill Rd. from Wisteria Lane to just north of Lake Place running along the property line between our Circle B Springs HOA properties, the Riboli Family Winery and the Cava RV Resort. That transmission line will be 25 feet from our 3725 Golden Hill Road driveway. The presence of such a powerline is unfathomable as to the impact it will have on our property values, aesthetics and environment as well as our health, safety and welfare of residents. This is something we would have to live with for the rest of our lives.

Taking into account the Draft EIR, several routes have been studied. The PLR-1A route, which I understand our City approved, is still the most logical of all the suggested routes as it would be mostly in agriculture less residential areas. Thus, it would have less impact on all issues of concern, e.g. disruption of the population, negative impact on the residential/business areas, safety and noise pollution as well as environmental pollution.

Would you want to live 25 feet from a 105 foot steel tower that crackles and sparks 24 hours a day for the rest of their lives?
