SUBJECT: Opposition to SE-PLR-2
Templeton - So. River Road

Dear Dr. Engels

I am writing to you to express my opposition to the South River Alternative for the following reasons:

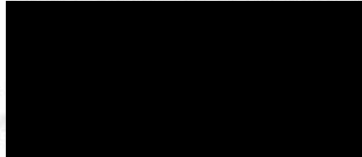

I understand the reasons for expanding and updating our electrical system. However, there are better ways of doing this program.

First, lets come to the 21st century and place it under ground. I know it would cost more however, would it really? When you consider law suits and all of the legal issues.

There is a host of other issues; transmission lines in fire hazard area, fault lines, wild life such as Bald Eagles and others, aging oak trees, health of local people, property values (law suites) and the list goes on!

You get the idea, this is not the proper method for this project.

There Must Be A Better Way!
