**RE: Review of San Diego Gas and Electric Company's Application for a Permit to Construct the Salt Creek Substation Project (A. 13-09-014)**

Dear Ms. Pierce:

The Energy Division of the California Public Utilities Commission (CPUC) has completed its review of San Diego Gas and Electric Company's (SDG&E) application (A. 13-09-014) for a Permit to Construct the Salt Creek Substation Project.

Section 15100 of the California Environmental Quality Act (CEQA) requires the agency responsible for the certification of a proposed project to assess the completeness of the project proponent's application. The Energy Division uses CPUC's Information and Criteria List and PEA Checklist as the guide for determining the adequacy of project applications.

The Energy Division finds that the application including SDG&E's response contains sufficient information to satisfy the requirements of the Commission's Information and Criteria List and deems this application complete.

Though the Energy Division deems this application complete, the CPUC may request additional data, as necessary, to prepare a complete and adequate analysis of potential environmental effects associated with this proposed project in accordance with the requirements of CEQA.

Please direct questions related to this application to Jason Coontz at CPUC.

Sincerely,

Jason Coontz  
California Public Utilities Commission
