

## Nest Survey Report

<u>Date:</u> 04/8/2019			
Biologist(s): Amy Trexler			
Survey Area/Location/Structures: Pole location: P05 (Segment 2 – Section			
Proposed Construction within Sur Proposed construction activities include		oad and recontouring acces	ss road.
Is Vegetation Clearing Required?	Yes: No: 🖂		
Was Complete Survey Coverage A	Achieved? Yes: ⊠ No	: 🗆	
Details of modifications to the sur	vey area if complete cove	cage was not achieved:	N/A
<b>Survey Conditions:</b>			
	Start	End	
Time	7:15 am	8:45 am	
<b>Temperature</b> (° <b>F</b> ):	60 °	63 °	
Wind Speed (mph):	0-5 mph	0-5 mph	
Cloud Cover (%):	10%	10%

### **Habitat(s) and Vegetation Description within Survey Area:**

- Ornamental
- o Disturbed
- o Chaparral
- o Coastal sage scrub

#### **Description of Survey Methodology:**

**Precipitation Type (if any) and duration:** 

The biologist conducted active and passive surveys within a survey buffer of 0.25 mile for white tailed kite, 500 feet for raptors, coastal California gnatcatcher, and least Bell's vireo, 250 feet for passerine birds in open space, and 150 feet for common passerines in residential, commercial and industrial areas. Active survey methods included walking meandering transects through the habitats while observing bird behavior with the aid of binoculars and directly searching in vegetation, the ground, the towers/poles, and other potential nest substrates. Passive survey methods included stationary observation periods from select vantage points that provided maximum visibility of the survey areas, using binoculars as necessary. If potential nesting behavior was observed within the survey buffers, specific shrubs were directly searched for nests in the areas where birds may have been observed exhibiting higher levels of activity or potential breeding behavior. All potential raptor nesting areas within the survey buffers were searched directly and/or with the aid of binoculars. Visibility, access, time of year and weather conditions were all conducive to collecting comprehensive breeding data, and ample time was spent surveying all potential nest sites.

<b>Suitable Raptor Nesting Habitat:</b>	Yes: 🖂	No:
Suitable CAGN Nesting Habitat:	Yes: 🗵	No:

Suitable LBV	Nesting Habi		urvey Resul	Yes: □	No: 🛛	alk Biological,inc.
Nest(s) Located (cor (Include previously loc				Yes:	No: 🖂

- $1-Date\ (mmddyyy)\_Biologist\ Initials\ (ABC)\_Number\ ID\ (01)$
- 2 Include common name and four letter AOU species code
- 3 3 Federally Endangered (FE), Federally Threatened (FT), State Endangered (SE), State Threatened (ST), Species of Special Concern (SSC), Watch List (WL), Common
- 4 Building, Incubating, Nestling, Fledged, Complete/Inactive
- 5 Observation Notes: Item Carry (IC- nest material, food items, fecal sacs that indicate nesting in progress), Agitated/Territorial Behavior (ATB indicating potential nest sites or an intent to nest), Courtship Behavior (CB copulation, chasing flights, displays, etc.), Pair in Suitable Habitat (PSH utilizing all or portions of the buffer zone), Other

## Avian Species Observed (complete common name):

Allen's hummingbird (ALHU), Anna's hummingbird (ANHU), blue-gray gnatcatcher (BGGN), bushtit (BUSH), California thrasher (CATH), California towhee (CALT), common raven (CORA), house finch (HOFI), lesser goldfinch (LEGO), mourning dove (MODO) red-tailed hawk (RTHA), spotted towhee (SPTO), wrentit (WREN), and yellow-rumped (Audubon's) warbler (YRWA).

# <u>Additional Notes (see Avian Species Observed and Observation Notes for definition of abbreviations):</u>

ubbi e i lations / t		
BGGN: PSH, ANHU: ATB		
Nesting WTKI within 0.25 miles:	Yes:	No: 🖂
Nesting Raptor, CAGN, or LBV within 500 feet:	Yes:	No: 🖂
<b>Nesting Passerine within 250 feet (open space only):</b>	Yes:	No: 🖂
Nesting Passerine within 150 feet (residential, commercial, residential areas):	Yes:	No: 🛛

## **Establishment of Nest Buffer and Justification:**

N/A
