

MEMORANDUM

Date: September 29, 2015
To: Informational Workshop Participants
From: Jeff Thomas, Panorama Environmental, Inc.
Subject: Revised Workshop Presentation Handout for the Sycamore—Peñasquitos 230-kV Transmission Line Project

At our evening informational workshop on September 29th it was brought to our attention that there was a misrepresentation of Alternatives 3 as a prior Sunrise Powerlink alternative previously recommended by the West Chase Homeowners Association and Rancho Peñasquitos Concerned Citizens. Upon further review of the Sunrise Powerlink Project Environmental Impact Report/Environmental Impact Statement alternative descriptions, we confirmed that both Alternatives 3 and 5 in the Environmental Impact Report for the Sycamore—Peñasquitos 230-kV Transmission Line Project are not identical to but are modified alternatives that are largely similar to the Sunrise Powerlink Alternatives. Therefore, the enclosed revised workshop presentation handout reflects the fact that Alternatives 3 and 5 are modified versions of prior Sunrise Powerlink alternatives, not the specific Sunrise Powerlink alternatives previously recommended by local community groups.
