

Nest Survey Report

Date: 07/17/2017

Biologist(s): Jimmy McMorran

Survey Area/Location/Structures:

Stations: 486+00 -490+00 (Segment 3 – Section 5)

Proposed Construction within Survey Area:

Proposed construction activities include not-holing and excavation and trenching for installation of new

underground 230kV line and vaults.	g and excavat	ion and trem	ching for installation	i oi ne
Is Vegetation Clearing Required? Yes:	No: 🛛			
Was Complete Survey Coverage Achieved	? Yes: ⊠	No:		
Details of modifications to the survey area	if complete	coverage v	was not achieved:	N/A
Survey Conditions:				
	Start		End	
Time	7:45 am		09:30 am	
Temperature (°F):	70 °		75 °	
Wind Speed (mph):	0 mph		0-5 mph	
Cloud Cover (%):	90%		10%	
Precipitation Type (if any) and duration:	n/a		n/a	

Habitat(s) and Vegetation Description within Survey Area:

- Ornamental 0
- Disturbed 0
- Eucalyptus Woodland 0
- Coastal Sage Scrub

Description of Survey Methodology:

The biologists conducted active and passive surveys within a survey buffer of 0.25 mile for white tailed kite, 500 feet for raptors, coastal California gnatcatcher, and least Bell's vireo, 250 feet for passerine birds in open space, and 150 feet for common passerines in residential, commercial and industrial areas. Active survey methods included walking meandering transects through the habitats while observing bird behavior with the aid of binoculars and directly searching in vegetation, trees, the ground, the towers/poles, and other potential nest substrates. Passive survey methods included stationary observation periods from select vantage points that provided maximum visibility of the survey areas, using binoculars as necessary. If potential nesting behavior was observed within the survey buffers, specific shrubs were directly searched for nests in the areas where birds may have been observed exhibiting higher levels of activity or potential breeding behavior. All potential raptor nesting areas within the survey buffers were searched directly and/or with the aid of binoculars. Visibility, access, time of year and weather conditions was all cond ial nest sites.

ducive to collecting comprehensive breeding data,	and ample time was s	pent surveying all potent
Suitable Raptor Nesting Habitat:	Yes:	No: □

Balk Biological, inc.

Suitable CAGN Nesting Habitat: Suitable LBV Nesting Habitat:			Yes: ⊠ Yes: ⊠	No: No:	am brotograa, me.				
Survey Results									
Nest(s) Located (complete table below if yes)*: (Include previously located nests and current status)			Yes:	No: 🗵					
Nest ID ¹	Species ²	Listing Status ³	Nest Stage ⁴	Observation Notes ⁵	Latitude (decimal degrees)	Longitude (decimal degrees)			
1 - Date (mmddyyy)_Biologist Initials (ABC)_Number ID (01) 2 - Include common name and four letter AOU species code 3 - Federally Endangered (FE), Federally Threatened (FT), State Endangered (SE), State Threatened (ST), Species of Special Concern (SSC), Watch List (WL), Common 4 - Building, Incubating, Nestling, Fledged, Complete/Inactive 5 - Observation Notes: Item Carry (IC- nest material, food items, fecal sacs that indicate nesting in progress), Agitated/Territorial Behavior (ATB - indicating potential nest sites or an intent to nest), Courtship Behavior (CB - copulation, chasing flights, displays, etc.), Pair in Suitable Habitat (PSH - utilizing all or portions of the buffer zone), Other Avian Species Observed (complete common name): Bewick's wren (BEWR), black phoebe (BLPH), bushtit (BUSH), California towhee (CALT), Cassin's kingbird (CAKI), common raven (CORA), common yellowthroat (COYE), house finch (HOFI), Hutton's vireo (HUVI), lesser goldfinch (LEGO), Nuttall's woodpecker (NUWO), red-shouldered hawk (RSHA), scaly-breasted munia
