## 4.0 ENVIRONMENTAL IMPACT ASSESSMENT

The following sections (i.e., 4.1, Aesthetics through 4.18, Cumulative Impacts) evaluate the potential environmental impacts from construction, operation, and maintenance of the San Diego Gas & Electric (SDG&E) Company Tie Line (TL) 695 and TL 6971 Reconductor Project (Proposed Project). The analyses presented in this chapter are based on the following: (1) details of the Proposed Project as presented in Chapter 3.0, Proposed Project Description; (2) requirements under California Environmental Quality Act (CEQA) and the CEQA Guidelines; (3) California Public Utilities Commission (CPUC) requirements, including General Order 131-D and guidance materials; and (4) consideration of input from responsible and reviewing agencies. In accordance with the CEQA, the environmental impacts associated with the Proposed Project components are evaluated for the following resource areas:

- Aesthetics
- Agriculture and Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Mineral Resources
- Noise
- Population and Housing
- Public Services
- Recreation
- Transportation and Traffic
- Utilities and Service Systems
- Cumulative Impacts

Section 4.1 through Section 4.18 include discussions of the existing conditions as they pertain to each resource area, as well as the Proposed Project's potential impacts to these resources. In addition, at the beginning of each section, a checklist summarizing the level of impact (i.e., No Impact, Less than Significant Impact, Less than Significant Impact with Mitigation Incorporated, and Potentially Significant Impact) to these resource areas, according to the significance criteria used for analysis, has been included. The sections also include Applicant Proposed Measures (APMs) to lessen impacts related to the particular

resource(s), as appropriate. Section 4.18 Cumulative Impacts, discusses present and reasonably foreseeable future projects within the Proposed Project area and the Proposed Project's potential to contribute to a significant cumulative effect.

Technical support and references for the impact assessments are provided in the following technical appendices:

- Appendix 4.1-A: Visual Characterization Photographs
- Appendix 4.1-B: Visual Simulations
- Appendix 4.3-A: Air Quality Modeling Results
- Appendix 4.4-A: Biological Technical Report (Biological Technical Report Appendices A, G, and I are Confidential)
