Subject: RE: (External):RE: SBCRP: All Segments - Air Quality and PM10 Certified Sweepers

Thanks Jenny for the quick response.

As we continue to look for additional PM10 certified sweepers, we'll be employing the one found PM10 certified sweeper and the SC8000.

Thank you.

Marcus,

The CPUC has reviewed your request and documentation. We find the information satisfactory, therefore, the CPUC approves the use of the SC8000 sweeper while SCE continues to look for PM10 certified sweepers.

Regards,
Jenny

Subject: SBCRP: All Segments - Air Quality and PM10 Certified Sweepers

Hey folks, we have identified an emerging issue.

The Contractor has been finding it very difficult to locate PM10 certified sweepers (see attached South Coast AQMD Cert Sweepers, as referenced in FEIR Section 2.3 Table 4.3-5). As of Friday, they had contacted four vendors that have all stated they do not have in their inventory any PM10 certified sweepers.

Currently, they have found only one certified sweeper from San Diego that they're bringing to the project site (Tymco 600).

As the project continues to look for certified sweepers, we are proposing to use SC8000 (see attached proposed sweeper) to supplement the fleet. The SC8000 is a rider scrubber that employs Dust Guard to suppress airborne fugitive dust.

Please let me know your thoughts.

Thank you.
