DATA REQUEST SET A1504013 ED-SCE-03

To: ENERGY DIVISION
Prepared by: Roman Vazquez
Title: Project Engineer
Dated: 04/03/2017

Question 2.0:

The CPUC has prepared a draft Project Description for the Subsequent Environmental Impact Report (EIR) using information included in SCE's Application and responses to Deficiency Reports and Data Requests.

The CPUC has identified additional data needs within the Draft Project Description that are required to complete the project description and environmental resource assessment for Subsequent EIR... We request that SCE provide clarification edits and comment to the CPUC using the Microsoft Word track changes feature and comment feature.

Response to Question 2.0:

Attached please find SCE's comments to date regarding the proposed Draft Project Description (Section 2.0) of the Supplemental Draft Environmental Impact Report (EIR) the CPUC is preparing in support of the Riverside Transmission Reliability Project (RTRP). SCE understands that the Draft Project Description circulated is intended to address "changed circumstances" the CPUC believes to have occurred since the City of Riverside adopted its Final EIR in support of RTRP on or about February 5, 2013. SCE appreciates the opportunity to provide comments on this draft and would welcome the opportunity to discuss our comments with the Energy Division and its consultant.
